PROFESSIONAL SUMMARY

Product Designer specializing in AI-driven cybersecurity experiences, with 7+ years of expertise across Agentic UX, enterprise SaaS, and data-heavy dashboards. Experienced in designing complex security ecosystems spanning SOX operations, attack surface management, and threat intelligence. Focused on turning high-signal security data into clear, automation-driven experiences that reduce analyst effort and support faster investigation. Experience includes agentic search and context-aware discovery workflows, alongside close collaboration with engineering, AI/ML, and security teams to deliver scalable products across B2B and B2C.

CORE COMPETENCIES

Design: Agentic UX & Search | AI Product Design | Cybersecurity UX | Enterprise SaaS | Data Visualization | Design Systems | User Research | Interaction Design
Technical: Prompt Design | Context Management | Human-in-the-Loop Design | Workflow Automation | Dashboard Design | Navigation Systems
Domain: Attack Surface Management | Threat Intelligence | Risk Scoring | Alert Triage | Incident Investigation
Tools: Figma | Adobe CC | Lovable | Notion

PROFESSIONAL EXPERIENCE

UX Lead
July 2024 · Present
Prevalent AI — *2 years 4 months*

- Lead end-to-end UX strategy for AI-driven cybersecurity products, integrating user research, data analytics, and autonomous workflow design to strengthen attack surface discovery and exposure management.
- Contribute UX direction for Navigator's agentic search experience, shaping natural-language intent, context-aware result exploration, and analyst-guided follow-up workflows across security data.
- Drive product evolution with engineering, AI/ML, and security SMEs, improving navigation and creating scalable enterprise experiences.
- Champion design systems and design-thinking practices, establishing consistent patterns for AI-first security product development.
- Use data-backed decision-making to measure and improve product adoption, engagement, and analyst efficiency.

Senior UX / Visual Designer
September 2021 – June 2024
Prevalent AI — *2 years 10 months*

- Designed data visualizations for cybersecurity big data, building multi-level dashboards for audiences ranging from C-suite executives to junior analysts.
- Developed UX patterns for risk scoring, alert triage, and controls monitoring to reduce cognitive load in high-stakes security environments.
- Created explainability interfaces for AI-driven threat detection, supporting transparency and trust in automated security decisions.
- Led design initiatives for intent-based interactions and context-aware workflows in enterprise security operations.

UX Designer
November 2020 – August 2021
Prevalent AI — *10 months*

- Contributed foundational UX design and reusable patterns for complex cybersecurity workflows.
- Worked with product and engineering teams to apply user-centered design principles in early-stage product development.

UX Designer
September 2020 – November 2020
Tuna Software Solutions Pvt Ltd — *3 months*

- Specialized in VR/AR immersive experience design for enterprise clients, including Bosch and AGFA.
- Delivered spatial interfaces and 3D interaction models for industrial applications.

PROFESSIONAL EXPERIENCE (CONTINUED)

User Experience Designer **June 2019 – October 2020**
Crypt4Bits *1 year 5 months*

- Improved customer experiences for e-commerce and SaaS products through user research and iterative design.
- Applied data-driven design strategies to improve conversion rates and user engagement.

EDUCATION

Bachelor of Business Administration (BBA) Annamalai University

Professional Development The Interaction Design Foundation
